

756. 6. 17  
*Vox Stellarum* *W. 465*  
OR, A LOYAL *3*  
**ALMANACK**  
for the Year of HUMAN REDEMPTION,  
M DCC LXXXI.

BEING  
the First after BISSEXTILE or LEAP-YEAR.

IN WHICH ARE CONTAINED

All THINGS fitting for such a WORK; as,  
A TABLE of Terms and their Returns;  
The Full, Changes, and Quarters, of the MOON;  
The Rising, Southing, and Setting of the SEVEN STARS,  
and other Fixed Stars of Note; the MOON's Age; and

A TIDE TABLE fitted to the same:  
The Rising and Setting of the Sun; the Rising, Southing,  
and Setting, of the Moon; Mutual Aspects, Monthly Ob  
servations; and many other Things, useful and profitable

UNTO WHICH ARE ADDED,

Astronomical Observations on the Four Quarters of the Year.  
An HIEROGLYPHIC, alluding to these present Times;

A remarkable CHRONOLOGY; the ECLIPSES;  
And other MATTERS, both curious and profitable.

With a particular Judgement of Two visible Solar Eclipses,  
and many other Things relating to Astrology.

By FRANCIS MOORE, Physician.

L O N D O N,

Printed for the Company of STATIONERS, 1781.

and Sold by JOHN WILKIE, at their Hall in  
LUDGATE-STREET. [Price Nine Pence, stitched.]

*Ephemerides. h.*

	700	2 18 4	5 16 8	8 15 0	17 10 0	26 5 0	35 0 0
	800	3 6 8	6 13 4	10 0 0	20 0 0	30 0 0	40 0 0
	900	3 15 0	7 10 0	11 5 0	22 10 0	33 15 0	45 0 0
	1000	4 3 4	8 6 8	12 10 0	25 0 0	37 10 0	50 0 0

If you would know the Interest of One Hundred Pounds for one Month, two Months, three Months, six Months, nine Months, or one Year, look for 100l. in the Side; and in the next Column, under 1 Month, is 8s. 4d.; for 2 Months 16s. 8d.; for 3 Months 21. 5s.; for 6 Months 42. 10s.; for 9 Months 63. 15s.; and for a Year 80. 0s.; and so of the rest.

This is the honest Way by which Men should  
To Interest let their Silver and their Gold;  
Yet worldly Misers, when to Raking fall,  
They with their Interest get the Devil and all.

# **A TABLE of Terms and Returns for the Year 1781. 5**

**Hilary Term begins Jan. 23, ends Feb. 12.**

Returns or Effoign Days.		Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	Jan. 20	21	22	23	Tuesday
From the Day of St. Hilary in 15 Days	27	28	29	30	Tuesday
On the Morrow of the Purif. of Bl. V. M.	Feb. 3	4	5	6	Tuesday
In eight Days of the Purif. of the Bl. V. M.	9	10	11	12	Monday

**Easter Term begins May 2, ends May 28.**

From the Day of Easter in 15 Days	April 29	30	M 1	2	Wednesday.
From the Day of Easter in 3 Weeks	May 6	7	8	9	Wednesday.
From the Day of Easter in 1 Month	- 13	14	15	16	Wednesday.
From the Day of Easter in 2 Weeks	- 20	21	22	23	Wednesday.
On the Morrow of the Ascension	- 25	26	27	28	Monday

**Trinity Term begins June 15, ends July 4.**

On the Morrow of the Holy Trinity	June 11	12	13	15	Friday
In eight Days of the Holy Trinity	- 17	18	19	20	Wednesday.
From the Day of the H. Tr. in 15 D.	- 24	25	26	27	Wednesday.
From the Day of the H. Tr. in 3 Weeks	July 1	2	3	4	Wednesday.

**Michaelmas Term begins Nov. 6, ends Nov. 28.**

On the Morrow of All Souls	Nov. 3	4	5	6	Tuesday
On the Morrow of St. Martin	- 12	13	14	15	Thursday
In eight Days of St. Martin	- 19	19	20	21	Wednesday.
From the Day of St. Martin in 15 Days	25	26	27	28	Wednesday.

N. B. No Sittings in Westminster-Hall on Ascension-day, Midsummer-day, and the Second of February.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, The first and last Days of every Term are the first and last Days of Appearance.

Septuagesima Sunday	-	Feb. 11	Advent Sunday	Dec. 8

## A short Description of the visible World.

**T**HE World, saith Aristotle, is the Order and Distribution of all Things, kept and preserved of God, and for God. But more properly and piously take it thus; The World is the Ordination and Distribution of all Things, which is created of God, and preserved by him. It is called by the Greeks, *Cosmos*, à pulchritudine, because of the excellent Beauty of the Heavenly Bodies, as the Sun, Moon, Planets, and other Stars, which caused Plato to say, That Eyes were given to Man to view the glorious and spangled Canopy of the Heavenly Vault: and though there are other Uses for which we have our Eyes, yet, without Question, this is a chief one, as may appear also by Ovid:

*Os homini sublime dedit, Cœlumque tueri  
Jussit, et erectos ad Sydera tollere vultus.*

As touching the Order, Distribution, and Form of the World, the learned Astronomers have delivered their Opinions in all Ages, some supposing (not many Centuries after the Creation) that the Sun was in the Center of the World. Others (as Aristotle) that the Earth was the Center of the Orbs, both of the Sun, Moon, and all other Stars; according to which Supposition, Ptolemy framed his Hypothesis and Theory of the Planetary Motions, which continued in Use (though not without some Emendation) till after the Year 1500: but the exceeding Falsity thereof being then discovered by the learned Copernicus, hath since administered Occasion, after a farther Scrutiny, and more diligent Search, into these abstruse and mysterious Arts, which being since undertaken by the learned and renowned Heroes of this and the last Age, have made so great a Proof of the Verity thereof, that the greatest Opponents of that most absolute Hypothesis are wrapt up (as it were) in a Labyrinth, yea, and stricken into Amazement; and indeed so powerful and valid are the Geometrical Demonstrations, and so accurate and certain to represent the Phænomena and true Motions of the Heavens, that the very meanest Tyro that the divine Urania employs in her Service can most easily and certainly tell them the Error of the one, and the Certainty of the other.

But the Truth hereof being apparent in itself, and approved by all the most learned Mathematicians of all Nations, I shall not insist further upon this Subject at present, but shall lay down some Principles, which may serve for the Information of such as have not yet experienced the Astronomical Truths.

1. We find that the Sun and Fixed Stars shine with their own innate and proper Light.
2. That the Moon and other Planets in our System have no Light of their own, but receive it of the Sun.
3. That the Earth differs not (*ratione Luminis*) in respect of her Light from the other Planets.

4. That

4. That the Sun may be numbered among the Fixed Stars, and the Earth among the Planets.
5. That the Fixed Stars do always keep the same Distance one from another, but it is otherwise among the Planets.
6. That the Fixed Stars are far remote, and without the Perimeter of the Sphere of Saturn, yet are not (as Antiquity thought) all placed in one Sphere, but every one hath a vast Space about it (perhaps a Planetary System) destitute of other Fixed Stars.
7. That the Heavens have fluid and not solid Orbs.
8. That the Earth resteth in its Sphere, or Heaven, yet notwithstanding is carried about by virtue thereof, which may also be understood of all the other Planets.
9. That the Earth (speaking properly) is not moved, nor any of the other Planets, although they are transferred or carried about by their Orb or Heaven.
10. That all the Primary Planets are carried about the Sun, who is the true and undoubted Center of their Vortex.
11. That as the Earth is carried about the Sun, as her proper Center, even so is the Moon transferred about the Earth.
12. That all the Planets are not carried about the Sun, in perfect Circles, but in Ecciptick Paths or Orbs.
13. That no Translation of the Earth can cause any Parallax in the Fixed Stars, in respect of the great Distance from the Eye.
14. That it is altogether impossible to know the Distance of the Fixed Stars from the Earth, and consequently from one another.
15. That if the Earth were beheld from Saturn, it would appear much like unto him, both in Magnitude and Lustre.
16. That the Directions, Retrogradations, and Stations, of the Planets, with the Velocity and Tardity in their Motions, are not Essential, but only an Appearance at the Earth in respect of their Situation and Position one to another.
17. That the Distance of the Planets may be known both from the Earth and the Sun, and mutually from one another.
18. That the Secondary Planets (as the Moon and the Circumjovials) are carried about their Primary Planets, and retain their Bodies for their Centers about which they move.
19. That the Earth (and probably the other Planets) hath a proper Motion upon her own Axis, which is uniform and equal, in Respect of the Conversions of her Meridian to the Sun.
20. That all the Phænomenas of the Heavens may (upon the Copernican System) most easily and exactly be resolved and determined according to these Principles.

# 8. JANUARY hath XXXI Days.

My Genius, mount on Contemplation's Wings,  
 With Seriousness consult the State of Things;  
 Charm not thy Reader with the Harmony  
 O' th' errant Stars within the azure sky.  
 For Mars moves slow, in order to express  
 His cruel and inhumane Wickedness.

5	8	6	3 54 7 59	and the great councils of Europe are di-
6	8	5	3 55 8 48	versely employed ; some are only for de-
7	8	5	3 55 9 42	fence, others are for offence, and some
8	8	4	3 56 10 40	for no action at all, unless it be to do
9	8	3	3 57 11 41	injustice. Saturn is in sagittary, and not
10	8	2	3 58	long since being conjoined with the sun,
11	8	1	3 59 0 40	Full Moon 10th Day at Morning.
12	8	0	4 0 1 40	this gives the Spaniard strange suspicious
13	7 59	4	1 2 35	divided councils with fruitless endea-
14	7 58	4	2 3 27	vours. Mars keeps company with Jove,
15	7 56	4	4 4 17	this provides matter for some months
16	7 55	4	5 5 6	following. Flanders has strange fears
17	7 54	4	6 5 54	and suspicions, and indeed they are not
18	7 52	4	8 6 44	jealous without a cause, for near these
19	7 51	4	9 7 36	Last Quar. 17th Day at 2 Morning.
20	7 50	4	10 8 27	times they may expect a griping in the
21	7 48	4	12 9 24	bowels, which will be as dangerous as
22	7 47	4	13 10 19	a dysentery. London bears a share and
23	7 45	4	15 11 13	part in the jealousies and fears of this
24	7 44	4	16 0 5	month and the month approaching, but
25	7 42	4	18 0 53	these things vanish and come to nothing
26	7 40	4	20 1 38	after a great deal of talk. The affairs
27	7 39	4	21 2 19	New Moon 24th Day at Noon.
28	7 37	4	23 2 57	of France seem to have trouble in good
29	7 35	4	25 3 39	earnest, and are threatened not only with
30	7 33	4	27 4 18	plots, but the death of a great man too.
31	7 32	4	28 4 59	Time hath past by what was 1 <sup>th</sup> last
				year's date,
				All did not jump, but most was fortunate;
				But if one truth may slip my harmless pen
				Times yet would mend, would all be
				honest men.

# 10 FEBRUARY hath XXVIII Days.

Old surly Saturn clouds the Queen o' th' Skies  
 With his black Veil, and darks her sparkling Eyes.  
 Hence Dark and Moisture cometh not unlike  
 Unto the Season for to fill the Dike:  
 But not unto Excess; Jove to the Sun  
 Remits the Cold before the Month is done.

1	7 30	4 30	5 49	First Quar. 1st Day 5 at Night.	
2	7 29	4 31	6 28	Great councils and consultations carried	
3	7 27	4 33	7 19	on in many parts of Europe very hope-	
4	7 26	4 34	8 14	fully about the beginning of this month,	
5	7 24	4 36	9 13	but suddenly after jealousies arise, to the	
6	7 22	4 38	10 15	great discontent and discomposure of	
7	7 20	4 40	11 15	those princes where such ill-minded a-	
8	7 18	4 42	Morn.	gents act their parts; but we wish a	
9	7 16	4 44	0 14	Full Moon 8th Day 8 at Night.	
10	7 14	4 46	1 10	happy period may be put to all differ-	
11	7 12	4 48	2 3	ences and disordered passions amongst	
12	7 11	4 49	2 54	us, from whom so frequently arise pri-	
13	7 9	4 51	3 45	vate animosities and secret disgusts, not-	
14	7 7	4 53	4 35	withstanding the most hopeful endeavours	
15	7 5	4 55	5 26	of many persons to prevent the same.	
16	7 3	4 57	6 20	Now all persons generally appear very	
17	7 1	4 59	7 14	Last Quar. 15th Day at Noon.	
18	6 59	5 1	8 11	active, both at court, city, and country;	
19	6 57	5 3	9 7	great are the expectations of the people	
20	6 55	5 5	10 2	at or about these times. The merchants	
21	6 53	5 7	10 49	of London receive welcome news from	
22	6 52	5 8	11 35	the Western Islands, and profitable re-	
23	6 50	5 10	12 18	turns with it. Some learned persons	
24	6 48	5 12	0 58	meet honour and preferment, but many	
25	6 46	5 14	1 38	will be turned out of their places for	
26	6 44	5 16	2 16	New Moon 23d Day at 6 Moon.	
27	6 42	5 18	2 56	tricks of craft and improbity.	
28	6 40	5 20	3 41	A many heads are seldom of one mind,	
				Which often makes them louder than	
				the wind.	

VENUS is a Morning Star till the 1st of June; from thence she  
 becomes Occidental, and an Evening Star to the Year's End.

12 MARCH hath XXXI Days.

O' th' angry Heaven see what's upon the Stage,  
A dire Conjunction of an ill Prefage.  
Slighted by none but such who views a Star,  
And never learn'd what Constellations are:  
And only rests contented with the Light,  
Knows nought beyond his own unknowing Sight,

25	5 50	6 10	0 23	riously debated, tending to the regula-
26	5 48	6 12	1 4	tions of old customs and privileges, and
27	5 46	6 14	1 45	New Moon 24th Day at Midni.
28	5 44	6 16	2 28	the extirpations of others. Verbum satis.
29	5 42	6 18	3 15	Where are those magazines of wit now
30	5 40	6 20	4 7	gone, [t've done]
31	5 38	6 22	5 0	And where's the wonders that they thought
				Their bare-fac'd folly hath appear'd so
				plain, [again]
				They'll scarcely dare to act the same

# 14 APRIL hath XXX Days.

See the two Fortunes in a Trine are met,  
 With Stars of various Nature dry and wet:  
 But we're in fear that the heavenly Powers  
 Will not afford us plenty of April showers,  
 Till towards the End moist Applications be,  
 And such like Influence we hope to see.

Here's royal Sol with Venus mild conjoin'd,

Justice and Power justly cast and coin'd.

Hermes next at Chronos casts his Rays,

And gives us Rain, after some cloudy Days.

Hermes with Labour doth his Venus win;

Both warm their Fancies with the Approach of Spring.

1	4	24	7 36 10 3	We of the English Nation are not yet free
2	4	25	7 35 11 1	from Doubts and Fears of some impending
3	4	27	7 33 11 54	Rupture, that may break out unhappily
4	4	28	7 32 Morn.	Full Moon 4 Day, at 6 Morning
5	4	30	7 30 0 42	amongst us: but we hope God Almighty will
6	4	32	7 28 1 28	so direct the Nation's Councils and Actions,
7	4	33	7 27 2 10	that we need not fear Ruin, Destruction, or any
8	4	35	7 25 2 50	considerable Injury from our most hateful Ene-
9	4	36	7 24 3 29	mies either at home, or abroad. Ambiguous
10	4	38	7 22 4 9	Reports, and pernicious Rumours, are too fre-
11	4	40	7 20 4 51	quently spread Abroad; but swift-footed Time
12	4	41	7 19 5 35	Last Quarter 12 Day, at 8 Morning.
13	4	43	7 17 6 22	
14	4	45	7 15 7 12	doth manifest the Design and End thereof.
15	4	47	7 13 8 7	God preserve the English Nation from all epi-
16	4	49	7 11 9 4	demical Diseases this Year, and ever. Serious
17	4	50	7 10 10 4	and long-winded Debates do near this Time or
18	4	52	7 8 11 3	Month, take up the Councils of the most pru-
19	4	54	7 6 11 59	New Moon 19 Day, at 3 Afternoon.
20	4	56	7 4 0 51	dent Men of Europe, how to carry on the
21	4	58	7 2 1 43	Actions of the Solstitial and Autumnal Quarter.
22	5	0	7 0 2 34	Near Home here are rash Actions at Hand;
23	5	1	6 59 3 24	and the misled Fancies of some pretending to
24	5	3	6 57 4 17	religious Things, do endeavour to raise Factions,
25	5	5	6 55 5 11	even to the Disturbance of all good people.
26	5	7	6 53 6 7	First Quarter 26 Day, at 7 Morning.
27	5	9	6 51 7 4	
28	5	10	6 50 8 3	Some very learned Person (cujus ordinis nescio)
29	5	12	6 48 9 0	either in much Disgrace, or Dishonour, leaves
30	5	14	6 46 9 54	this unhappy Life for a better.
31	5	16	6 44 10 43	Some welcome News the flowing Minutes bring
				To a fam'd Nation, or unto the King.

Now this Month's pleasing Aspects seem to bring,  
 A wholesome Air, a fertile latter Spring.  
 'Tis Heaven and her Motions do incline;  
 'Tis God alone, most high, that doth design.  
 The starry Motions sometimes do declare,  
 What in the Heaven of Heavens designed are.

# Moore. SEPTEMBER, 1781. 25

The 1 Day, at 2 Morn.	Mars	} is with the Moon.
The 17 Day, at 4 Aftern.	Mercury	
The 20 Day, at 2 Morn.	Venus	
The 21 Day, at 11 Night,	Jupiter	
The 23 Day, at 8 Morn.	Saturn	
The 26 Day, at 8 Morn.	Mars	

M D	Sun rises.	Sun sets.	Moon's South.	Observations.
1	5 18	6 42	11 30	
2	5 20	6 40	Morn.	Full Moon 2 Day, at 7 at Night.
3	5 22	6 38	0 13	All After-wit is like a Shower of Rain,
4	5 24	6 36	0 54	That falls untimely on the ripen'd Grain.
5	5 26	6 34	1 34	The Configurations of the Planets this pre-
6	5 28	6 32	2 13	sent Month, are neither very many, nor very
7	5 30	6 30	2 54	material, either in the Change of the Air, or
8	5 32	6 28	3 37	mundane Contingencies. That which is most
9	5 34	6 26	4 23	worthy our Notice is, the Square of the Sun
10	5 36	6 24	5 11	Last Quarter 10 Day, at Midnight.
11	5 38	6 22	6 2	and Saturn from Virgo and Sagittary, or a
12	5 40	6 20	6 58	fourth Part of the Ecliptic asunder. Now
13	5 41	6 19	7 57	every Agent endeavours to promote his own
14	5 43	6 17	8 54	clandestine Designs; but the Pains and Vigi-
15	5 45	6 15	9 50	lancy of some worthy Persons in Power, con-
16	5 47	6 13	10 45	
17	5 49	6 11	11 38	New Moon 17 Day, at Midnight.
18	5 51	6 9	0 30	tribute much to our Safety and future Happi-
19	5 53	6 7	1 22	ness; and we may very well consider and ac-
20	5 55	6 5	2 15	knowledge it as no mean Blessing which is,
21	5 57	6 3	3 10	and has daily been conferred upon us by the
22	5 59	6 1	4 8	Hand of Providence. We hope the Affairs of
23	6 1	5 59	5 7	Great-Britain remain still in good Order, not-
24	6 3	5 57	6 7	First Quarter 24 Day, 4 Afternoon.
25	6 5	5 55	7 5	withstanding the Confusion that hath been so
26	6 7	5 53	8 0	long endeavoured, and so happily frustrated and
27	6 9	5 51	8 51	confounded. Pleasing News in general arrives
28	6 11	5 49	9 38	towards the End hereof. But,
29	6 13	5 47	10 21	London! beware of Fires and Beasts of Prey,
30	6 15	5 45	11 2	And something else; but what I will not say.
				But what that is let Time itself descry,
				For that will speak the Truth, so may not I.

Mars to bright Jove doth a kind Aspect shew,  
 And Sol's obscur'd by Saturn's louring Brow.  
 Friends, after Difference, better do agree.  
 Thus Flats and Sharps sweeten true Harmony.  
 Jove conjoins Venus, likewise Hermes too:  
 This by Authority I let you know.

6	6 27	5 33	2 28	Aquary, and Mercury out of Libra into that	
7	6 29	5 31	3 14	treacherous Sign Scorpio this Month, may oc-	
8	6 31	5 29	4 5	casion not only considerable Alterations in the	
9	6 32	5 28	4 59	Air, but produce notable Overtures in Mun-	
10	6 34	5 26	5 54	Last Quarter 10 Day, at 3 Afternoon.	
11	6 36	5 24	6 49	dane Affairs also, which may not be so much	
12	6 38	5 22	7 45	apparent this Month, as in those immediately	
13	6 40	5 20	8 38	succeeding. And now we may expect many	
14	6 42	5 18	9 30	weighty (if not extraordinary) Consultations,	
15	6 44	5 16	10 27	very seriously and closely debated, tending to	
16	6 46	5 14	11 13	New Moon 17 Day, at 9 Morning.	
17	6 48	5 12	0 6	the Rectification and Regulation of certain old	
18	6 50	5 10	1 1	Customs and Privileges, and the Extirpation of	
19	6 52	5 8	2 1	others. The People, in general, hope well,	
20	6 54	5 6	3 1	and are in Expectation of better Days. Many	
21	6 56	5 4	4 1	flying Reports are spread abroad, out of Design	
22	6 58	5 2	5 4	and purposely to amuse and frighten them; and	
23	7 05	0 6	1 1	First Quarter 24 Day, at 4 Morning.	
24	7 24	58	6 54	that probably of an approaching Invasion, or	
25	7 44	56	7 42	some such like Mischief, which will very rarely	
26	7 64	54	8 36	be attempted. God preserve us from all con-	
27	7 84	52	9 8	tagious Diseases, all secret Plots and Designs	
28	7 94	51	9 48	whatsoever! I fear some Judgment impending;	
29	7 114	49	10 27	and we all know that	
30	7 134	47	11 7	Swift-footed Time exposes to the Light,	
31	7 144	46	11 47	Things hidden by the Shroud of sable Night.	

Wise Mariners provide against a Storm;  
 By early Prudence they prevent their Harm.  
 Great Men, and them great Wits, will act, you'll see,  
 By crafty Stratagems, prodigiously.  
 I fear the Influence of some cruel Star.  
 Let God keep Europe from an holy War.

# The Dominion of the Moon in Man's Body.

Passing under the Twelve Zodiacal

## CONSTELLATIONS.

♈ <i>Aries</i> Head and Face.	♎ <i>Libra</i> Reins and Loins.
♉ <i>Taurus</i> Neck and Throat.	♏ <i>Scorpio</i> Secret Members.
♊ <i>Gemini</i> Arms and Shoulders.	♐ <i>Sagittary</i> Thighs and Hips.
♋ <i>Cancer</i> Breast and Stomach.	♑ <i>Capricorn</i> Knees and Hams.
♌ <i>Leo</i> Heart and Back.	♒ <i>Aquarius</i> Legs and Ancles.
♍ <i>Virgo</i> Bowels and Belly.	♓ <i>Pisces</i> Feet and Toes.

## The Names and Characters of the Planets.

With the *Dragon's Head and Tail.*

♄ Saturn.	} ☉, or the Sun. }	♀ Venus.
♃ Jupiter.		☿ Mercury.
♂ Mars.		♁ the Moon.
♁ Dragon's Head.		
♂ Dragon's Tail.		

## The Characters of the Aspects.

♌ Conjunction.	} ☿ Opposition. }	♈ Trine.
* Sextile.		♎ Quatile.

## Upon the Twelve Signs,

- ♈ The Head and Face the *Ram* doth always rule :
- ♉ The Neck and Throat are govern'd by the *Bull*.
- ♊ O'er the Arms and Shoulders still the *Twins* preside :
- ♋ Breast, Stomach, Ribs, the crooked *Crab* doth guide.
- ♌ The noble *Lion* Rules the Back and Heart :
- ♍ The bashful *Virgin* claims the Belly Part.
- ♎ The Reins and Loins the equal *Balance* weigh.
- ♏ The *Scorpion* o'er the Secret Parts doth sway.
- ♐ The curious *Archer* doth the Thighs affect :
- ♑ So doth the *Goat* our bended Knees protect.
- ♒ The Legs unto *Aquarius*' Lot do fall :
- ♓ The *Fish* our active Feet their Portion call.

CHRONOLOGY of many remarkable Occurrences.

<i>Years of Christ</i>		<i>Years since</i>
1066	William (the Norman) conquered England - - -	715
1185	Ireland conquered by the English - - -	596
1299	Windmills invented - - -	482
1302	The Mariner's Compass invented - - -	479
1304	Edward I. reduced Scotland - - -	477
1330	Gunpowder discovered by a Priest - - -	451
1369	Wickliff first began the Reformation - - -	412
1441	Printing invented by a German - - -	340
1492	Columbus discovered America - - -	289
1517	Luther wrote against Indulgencies - - -	264
1521	Engraving on Wood invented by Albert Durer -	260
1535	Cannon first used - - -	246
1584	Virginia discovered by Sir Walter Raleigh - -	197
1590	Telescopes invented by Jansen, a Dutchman -	191
1600	K. Ch. II. born at Dumferling, in Scotl. Nov. 19,	181
1601	The Earl of Essex beheaded - - -	180
1603	Queen Eliz. died, King James succeeded - - -	178
1603	A great Plague in London, died 56570 - - -	178
1603	King James I. crown'd, July 15, at Westminster	178
1605	The Popish Gunpowder Plot, November 5 - -	176
1606	Guy Fauks executed in Parliament Yard - -	175
1608	Saturn's Satellites first discovered - - -	173
1614	The New River brought to London - - -	167
1616	Shakspeare the Poet died - - -	165
1625	A great Plague in London, died 34517 - - -	156
1625	King James I. died K. Charles I. crown'd, Feb. 2,	156
1632	A great Fire on London Bridge, Feb. 11 - -	149
1634	Old Parr died, aged 152, he lived in ten Reigns -	146
1641	The Earl of Stafford beheaded, May 12 - - -	140
1641	The cruel Irish Massacre began October 23 - -	140
1642	Edgehill and Brentford Fight - - -	139
1642	Sir Isaac Newton born, December 25 - - -	139
1643	Excise-Office formed - - -	138
1643	Newbury first and second Fight - - -	138
1646	Belvoire Castle surrendered to the Parliament -	135
1649	K. Charles I. beheaded, Jan. 30 - - -	132
1651	The bloody Fight at Worcester - - -	130
1655	George Fox, the first of the Quakers - - -	126
1658	Spring pocket-Watches, invented by Dr. Hook	123
1658	Oliver Cromwell died, Sept. 3 - - -	123
	C	1666

1660	King Charles II. restored, May 29	- - -	121
1661	K. Charles II. crown'd, April 23, at Westminster	- - -	120
1661	The Earl of Argyle beheaded, May 28	- - -	120
1661	A great Storm in London, Feb. 18	- - -	120
1662	The Royal Society instituted	- - -	119
1665	A great Plague in London, whereof died 68586	- - -	116
1665	Our Hamburgh Fleet taken by the Dutch-	- - -	116
1666	The lamentable burning of London	- - -	115
1666	War declared against Denmark, Oct. 19	- - -	115
1667	The Dutch burn our Ships of War at Chatham	- - -	114
1667	Peace with Holland, France, and Denmark	- - -	114
1667	The Royal Exchange built	- - -	114
1668	Peace proclaimed with Spain, Feb. 12	- - -	113
1669	The Royal Exchange first opened, September 28	- - -	113
1670	The Prince of Orange arrives at Whitehall	- - -	111
1671	A great Fire happened at Oxford, April 25	- - -	108
1672	War declared against the Dutch	- - -	109
1672	Halfpence and Farthings first coined, Aug. 16	- - -	109
1674	Peace with Holland, proclaimed Feb. 28	- - -	107
1677	Prince of Orange married to the Princess Mary	- - -	104
1678	The Popish Plot discovered-	- - -	103
1679	The Habeas-Corpus Act passed	- - -	102
1680	A great Comet appeared in December	- - -	101
1682	Another great Comet appeared	- - -	99
1683	The Penny-Post-Office established	- - -	98
1683	Lord Russel beheaded, July 21	- - -	98
1684	The great Frost that held 13 Weeks	- - -	98
1685	K. Charles II. died, and K. James II. succeeded	- - -	98
1685	The Duke of Monmouth beheaded, July 15	- - -	98
1688	{ The seven Bishops sent to the Tower, June 8	- - -	98
1688	{ The Pretender said to be born, June 10	- - -	98
1688	Prince of Orange landed at Torbay, Nov. 4	- - -	98
1688	King James II. abdicated, Dec. 12	- - -	98
1689	King Will. and Queen Mary crowned, April 11	- - -	98
1692	Port Royal swallowed up by an Earthquake	- - -	98
1692	A great Earthquake in England, Sept. 8	- - -	98
1693	Hackney Coaches first licensed	- - -	98
1693	Bank of England established	- - -	98
1694	Lotteries first established	- - -	98
1702	K. William died, and Q. Ann began to reign	- - -	98
1702	Queen Ann declared War against France	- - -	98
1703	A terrible great Wind, Nov. 26 and 27	- - -	98
1704	Gibraltar taken by Sir George Rook	- - -	98

706	The Battle at Ramillies on Whit Sunday	75
707	England and Scotland united, May 1	74
708	The Pretender attempted to invade Great-Britain	73
709	The French beat in the Woods of Blanglies	72
710	Great Riots and Disturbances in England	71
713	Peace with France proclaimed, May 5	68
714	Q. Ann died, and Geo. I. began to reign, Aug. 1	67
715	A total Eclipse of the Sun, April 22	66
715	The Rebellion in Scotland and Lancashire	66
716	A great Frost and Snow, a Fair on the Thames	65
718	The first Appearance of the Northern Lights	63
719	A great fiery Meteor, March 19, at 8 at Night	62
726	The great Sir Isaac Newton died, March 20	55
727	K. George I. died, June 11, K. Geo. II. procl.	54
727	An Earthquake in several Parts of England	54
739	War declared against Spain, October 23	42
739	Forts of Porto Bello destroyed by Admiral Vernon	42
743	The Battle of Dettingen, June 16	38
744	Anson completed his Voyage round the World	37
744	War declared by Gr. Br. against France, Mar 31	37
745	A Rebellion in Scotland	36
746	The Scotch Rebels defeated at Culloden, April 16	35
748	A general Peace concluded, October 7	33
750	Westminster Bridge finished, cost £389,500	31
752	The Date and Calendar altered	29
755	Lisbon destroyed by an Earthquake	26
756	War declared against France	25
757	The Militia Act passed	24
758	A large Comet appeared, foretold by Dr. Halley	23
760	K. Geo. II. died, Oct. 25, K. Geo. III. procl.	21
762	The American Philosophical Society instituted	19
762	A great Snow for 18 Days together, in Feb.	19
763	A general Peace proclaimed, March 22	18
765	Otaheite in the South Seas discovered	16
766	Gibraltar almost destroyed by a Storm	15
770	Blackfriars Bridge finished, cost £152,840	11
772	A Revolution in Denmark	9
772	The Sweeds forced to resign their Liberties to the King	9
773	The light Gold called in and recoined	8
775	War declared against North-America, Aug. 23	6
776	The Americans declare themselves independent	5
778	The French sign a Treaty with the Americans	3
778	War against France commenced	3
779	War against Spain begun	2

Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour.	Alt.	Magn.	Names of the Stars.	Rise h. m.	South h. m.	Sets h. m.
♂	53	1	Aldebaran, or Bull's Eye	1a 34	0a 48	0b 0
♂	29	1	Left Foot of Orion	4 31	1 31	1 34
♂	36	2	Middle * in Orion's Belt	4 13	1 51	0 35
♂	45	1	Right Shoulder of Orion	3 23	2 8	0 28
♀	21	1	Syrius, the great Dog	6 41	3 1	0 48
♂	43	2	Procyon, the little Dog	5 33	3 53	2a 7
♂	30	1	Heart of Hydra	8 39	5 41	2 44
♂	51	1	Regulus, Lion's Heart	7 26	6 21	5 16
♂	54	1	The Lion's Tail, Denab	8 42	7 54	7 7
♀	28	1	Virgin's Spike	12 46	9 38	6 36
♂	58	1	Arcturus	10 47	10 30	10 12
♂	12	1	Antares the Scorp. Heart	17 36	12 39	7 42
♂	46	2	Bright * of the Vulture	17 38	16 3	9b 27
♀	6	1	Fomalhaut	11 14	19 13	10 37
♀	56	2	Head of Andromeda	10 42	10 10	2 56

**T**HE brightest of the Seven Stars is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the D and ♀.

The fixed Stars all rise, south, and set about four Minutes sooner every Night than they did the Night before; this considered, the exact time of rising, southing, and setting for any intermediate night, not herein noted, may be very easily deduced from these tables, by inspection only.

To know the time of the rising, southing, and setting of any Star in this table, for any day required, it is but considering how many hours and minutes that Star rises, souths, or sets, either before or after the seven Stars on that day, and you will have your desire; observing that in this table, a stands for *after*, and b for *before*.

A Table shewing the Bearing, Distance, Longest Day, and Difference of Meridians of most of the principal Cities in the World, from the famous City of LONDON

An Account of the ECLIPSES, and other  
Astronomical Appearances for the Year 1781.

THERE will be two Eclipses of the Sun within the limits of this Year, as they were transmitted to me by my astronomical Friend Mr. Henry Andrews, Teacher of the Mathematics, at Royston, in Herts, with whom Youth are conveniently boarded and taught, and made fit for business. And as these two Eclipses fall about six months distance from each other, we may expect no Eclipse of the Moon, for the following reasons, in the words of the great Kepler *novilunia duo centralibus propinqua. Ergo circumstantia plenilunia illibata Eclipsis Lunæ toto anno nulla.* For which reason also such solar Eclipses are seldom visible in these northern parts of the earth: Yet notwithstanding both the above-mentioned Eclipses may be said to be visible in England, which in these high Latitudes is what doth not often happen. The first it is true is but a small one, yet (if the air be clear) will be very conspicuous before the sun sets, which with us will be before the Eclipse is over. But the last will be one of the largest Eclipses of the Sun, as is usually seen under such circumstances, by reason of the Moon being pretty far to the North of the Ecliptic, at the time of the visible conjunction, which will happen soon after the sun rises here in England; therefore the whole of this may be seen if the air prove favourable. The particulars of both these Eclipses, with their calculations and types, take as follows, which were deduced from very accurate solar and lunar tables, founded on the Newtonian system of gravitation. The first of these solar Eclipses happens on Monday the 23d Day of April, near sun set, and will (if the Sky is clear) be part visible, it is but a very small Eclipse with us in England, but in the West-Indies the sun will be centrally eclipsed, but it will be no where total, for through all which track of land the spectators will be entertained with a beautiful Annulus, or Ring of Light, encircling the Moon's dark body on every side. At London the Eclipse will be observed to be on the left side of the sun's lower limb at 37 min after 6 o'clock, the middle will be at 2 min past 7, and the sun will leave the horizon in about 8 min. after, according to apparent time. The quantity eclipsed will not exceed three quarters of a digit.

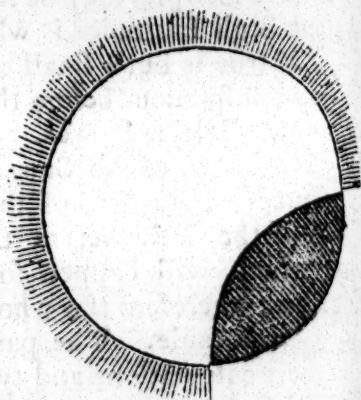

The

The second and last Eclipse pertaining to this year, which I have before told you, is of the sun, happeneth on Wednesday the 17th Day of October, in the Morning. This Eclipse is central, and total to part of the India ocean, and the interior parts of Africa, to the inhabitants whereof it will doubtless be very terrible, particularly in the tract of central appearance, where they will for the space of one minute, be surprized with a gloomy darkness, even like that at midnight. At London, the moon will make the first impression on the sun's disk, and the Eclipse will be first observed to the right hand of his upper limb, at 53 min. after 6 in the morning, the middle is at 37 min. after 7, and the end will be at 20 min. after 8 o'clock (solar time) digits eclipsed 3 deg. 46 min. The Type shews the manner of its appearance expected at London, and may tolerably serve the whole kingdom.

Type, April 23d, 1781.

Type, Oct. 17th, 1781.

My correspondent Mr. Henry Andrews, tells me that the Eclipse of the Moon which happened on the 30th of May, 1779, he observed in Leicestershire, and the morning was clear, and the Moon set eclipsed just in the manner he had calculated and drawn the type.

The Eclipse of the Sun that happened on June the 14th 1779, in the morning was not visible at Roylton, all the while it being a very gloomy forenoon,

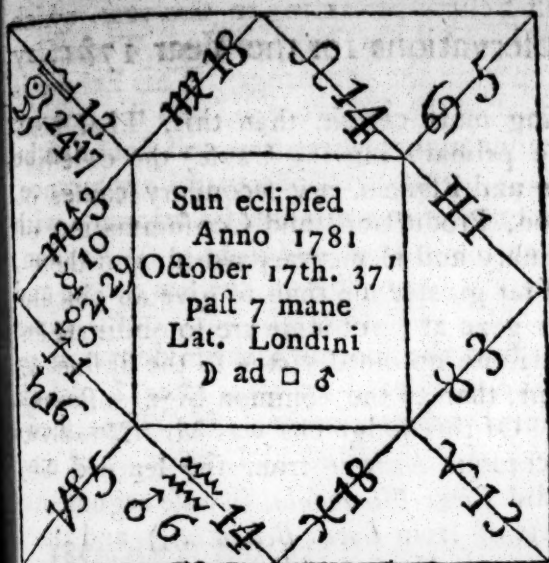

The total Eclipse of the Moon on Nov. the 23d, 1779, he observed at Roylton, (lat.  $52^{\circ} 4' N.$  and  $20''$  in time East of London) the beginning was cloudy, the immersion into the earth's shadow was at 6 h.  $53\frac{1}{2}'$  mean time, or at 7 h.  $6\frac{1}{2}'$  apparent, agreeing with his computation to less than half a minute. He could observe no more for the clouds, save the duration of total darkness—which exactly corresponded to his calculation. z. 1 h. 41'

As I have given the scheme for the mean time of the last solar Eclipse, whose type is on the other page, so I will speak a few words of the significations of it. *Jundline*, who has treated as largely and with as much reason and judgment upon the effects of Eclipses as any before or since his time, tells us, that if either of the luminaries be eclipsed in the airy triplicity, as the Sun is at this time, it betokens famine, pestilent diseases, with stormy tempestuous winds, very prejudicial to mankind. *Proclus* says, that an Eclipse happening in  $\Pi$ ,  $\triangle$ , or  $\gamma$ , prenotes famine and pestilent diseases. The City of *Lisbon*, *Frankford upon Maine*, *Vienna in Austria*, *Antwerp*, the country of *Alsatia Livonia*, and many other countries and places will be more or less subject to the effects abovementioned. But as Venus is dispositor of this Eclipse, and is just entered into the domal dignities of Jupiter, we hope somewhat the evils may be alleviated, for my author further says, that the good or evil which Venus shall signify, shall for the most part appear in mankind in oratories, and things divine tending to the service of God, in laws and civil constitutions, also in seeds and herbs, &c. it imports peace and tranquility, the advancement of some to honour, but if she be remote from the sun, it implies the death of many kings, or great persons — Why not the degrading or discarding of some eminent persons that are found guilty of infidelity, or treacherous actions, as to the trust reposed in them. Sometimes it is the precursor of some violent irruption, or overflowing of the sea-banks, and consequently a deluge, and thereby great damage in many countries: Which I leave to time to demonstrate the truth hereof, and so I have done with the Eclipse.

## Astrological Observations for the Year 1781.

**T**HERE is nothing more certain than this, That next under God (the primary moving Cause) the cælestial bodies, viz. the Stars and Planets, are secondary causes of Generation, Corruption, Production, and Consummation of all things in this sublunary and elementary world, and therefore are instruments of far greater use than to give an obscure light, or for people to gaze at; yet some are so obstinate in their opinion, as to attribute no more virtue to the influence of the Planets and Signs, than to the common Signs of every tavern and ale-house. Of this judgment was Mr. Chambers, who received a very copious Answer from the learned Sir Christopher Heydon, to did *Picus Mirandula*, (whose arguments Mr. Chambers makes use of from *Lucas Bellantius*;) and tho' *Sextus Empericus*, *Sextus ab Heminga*, *Pererius*, and many others denied the influence of the Stars; yet *Plerovannus*, *Gochlenius*, *Marascalerus*, and many others, (I suppose not inferior in learning to their adversaries,) have as much applauded their virtue and influence upon inferior bodies, as those aforesaid antagonists have exploded this truth. St. *Augustine* often in his works hath this saying, *Deus regit inferiora per superiora*. And the famous *Hermes* agrees in the same, where he writes, *Quod est superius, est sicut id quod est inferius*. And *Gersom* tells us, that heaven is God's instrument, whereby he governs this corruptible and inferior world. Yet it is confessed the Stars have no power or force upon the will of man, or upon the soul, but by accident, so far as the faculties thereof follow the temperature of the body. For *Galen*, and many others have proved, that *More's sequenter temperaturam corporis*. The heavenly bodies do not only incline the will by the mediation of the sensitive appetite, excited also by the constitution, but also infuse into its habits, complexion, and dispositions. And our modern, as well as ancient divines, allow the starry influences to extend the state of the weather, plenty or scarcity of the year, plague, sickness, and health of our bodies; as also to direct the physician when to purge by pill, when by potion, or phlebotomy. Their influences also reach even into the bowels of the earth, to the maturing and producing all sorts of minerals, and those strange effects which we daily meet with in the world. These things being premised,

Now

Now I will give you one of the prophecies of Nostradamus, which is fulfilling in these times ; it is the 34th in the 5th century : it runs thus in the French language.

Du plus profond de l'occident Anglois,  
Ou est le chef de l'isle Britanique,  
Entrera classe en Garonne par Blois,  
Par vin et sel faux cachez aux barriques.

English.

From the deepest westerly part of England,  
Where the chief of the Britain island is,  
A fleet shall come into the Garonne by Blaye,  
By wine and salt fire shall be hidden in barrels.

Annotations.

There is a notable and sensible error in the French copy, and without reforming it, the sense is not only obscure, but also impossible ; for instead of *Blois*, which the author hath put here (I suppose to make the time good) it must be written *Blaye*, which is a sea town of the mouth of the river *Garonne*, and *Blois* is a mid land town, upon the river *Loire*, about a hundred leagues distant from the other.

The rest signifieth no more, but that there shall be some warlike stratagem made use of by the French (understood here by the names of wine and salt) in putting fire into barrels.

The preceding hieroglyphic represents a mole endeavouring to catch at a crown. From hence I say, there seems at this time to be many parts of the world in disorder and confusion, and

and the fancies of most men will now swell with various suspicions, and several secret designs will be closely agitated between one nation and another; but after some time we have good grounds to believe we shall have a full manifestation of the whole matter, but how well it may please the generality, let time demonstrate, which brings us to the consideration of the winter quarter.

The winter quarter commences at such time as the sun touches the first scruple of the tropical sign Capricorn, which happens on Thursday, December 21st, at 51 minutes past 3 in the Morning, 1780, at which time 24 degrees of Leo is upon the mid-heaven, and 9 degrees of Scorpio ascends the east-angle, at which time also the planets places and aspects are as followeth, viz. ☉ in 0° 00' ♊, ♃ in 13° ♋, ♄ in 14° ♏, ♀ and ♁ nearly in conjunction in the ascendent about the middle of Scorpio, and the ☽ in the beginning of Scorpio in the 12th, applying to the ☿ of ♏ in 4 degrees thereof.

And now if I may crave the boldness to give my brief astrological and conjectural judgment of this quarter, (notwithstanding my foregoing monthly predictions) I shall modestly proceed thus, viz. The people in general, both in England, and most other countries of Europe, are still possessed with doubts and fears of some unhappy catastrophe impending, they are also subject to repine, and complain of the times, as also want of trade, of losses, crosses, and vexation in abundance, and not only so, but many contentions and unhappy divisions and animosities are strangely fomented, sometimes in point of religion (which is likely to be much controverted about this time,) and sometimes upon the least accidental occasion they swell with hateful malice against each other.

This is not all (and yet some may say when was it otherwise,) but 'tis further observable that most part of this quarter the generality of the people shall be very apt to repine, and secretly whisper very hard things against the actions and proceedings of their superiors, and principal rulers; nor will it be any easy matter to rectify these enormities; many scandalous and dangerous pamphlets and libels are privately dispersed, strange robberies on the land, and casual mischiefs at sea, by tempestuous storms and otherwise: But these things may be apparent more towards the midst and end of this quarter than the beginning. Various intelligence arrives from several parts of Europe, of very notable projects now hatching, which may be thought by good wits to be almost

prodigious, and perhaps end in confusion. — Great are the private consultations, councils and debates of those persons who shall envy them that sit at the stern, and their dangerous employments of steering the helm of public affairs in the midst of unsettled times. — *Fiat Dei voluntas.*

The diseases of this quarter should be for the most part of a cold and moist nature, as coughs, hoarseness, cathars, apoplexies, stoppage at stomach, inflammations, dropsies, stitches, cramps, aches in the joints, the scurvy, tedious agues, consumptions of the lungs, and ulceration thereof, melancholy wind-cholic, and divers others, but no epidemical diseases. From all which good Lord deliver us. — And thus I conclude the judgment of this quarter with this following piece of poetry, which may be well applied to our present times, viz.

Some with bold labour plow the faithless main,  
Some rougher storms in Princes courts sustain;  
Some swell up their slight sails with pop'lar fame,  
Charm'd with the foolish whistlings of a name;  
Some their vain wealth to earth again commit,  
With endless cares some brooding o'er it sit;  
Country and friends are by some wretches sold,  
To lie on tyrian beds, and drink in gold.

No price too high, for profit can be shown,  
Not brother's blood, nor hazards of their own.

### Of the Vernal or Spring Quarter.

Which, according to my calculations, begins at such time as the glorious lamp of heaven, the Sun, enters the first scruple of the celestial Ram, or more really when the earth enters the opposite point Libra, which either way taken happens this year on *Tuesday, March* the 17th, at 30 min. past 5 in the morning, and here we have 12 deg. of Pisces ascending, and 3 deg. of Sagitary culminating. By the revolution of the years of the world, is known what accidents shall be in that year, whether good or ill, whether peace or wars may be expected, of the state of kings, nobles and great men, and also the condition of the people, as well the religious as the common sort; and generally of all such matters as belong to man, of the plenty or scarcity of the fruits of the earth, *Guido Bon.* 489.

A Scheme

A Scheme of the grand Radix of the Year's Revolution, or  
Sol's Ingress into Aries. 1781.

Now you see the Sun Venus and Mercury are posited in the ascendent, the Moon in the 12th, and Jupiter retrograde in the 8th, the two infortunes in conjunction near the med-cæli, and the Sun is in square to them both. I must needs acknowledge this ingress to be no way favourable or promising to the good of Mankind, but I fear it presages misery and calamities to many nations in several parts of the globe, which I delight not to aggravate. People are now strangely possessed, and indeed afflict themselves with many fears and jealousies of some hidden mischief secretly hatching against them. A general repining, and complaint for want of trade, many treacherous consultations, breach of leagues and friendship, and some unhappy controversies break, or may be daily expected. Matters are out of frame; the grandees of the world agree not, or concur in judgment; the homunculi of nations dislike what is done: and the bad influences of the planets, or heavenly bodies, incline the temper of mankind unto choier and passion, to wrangle and contest one neighbour with another; one potentate is provoked against another; every town,

town, every city, every country divided in judgment one amongst another. Yet because the sun is most powerful, and by position represents magistracy, as kings, princes, dukes, and all noble and high born people, commanders or officers, in town or country, we may hope all divisions will be determined (though with difficulty) by a prudent magistracy. It is likely to be a year of many councils, and much action unto *England*, concerning her affairs in foreign parts; for if my judgment upon this vernal figure deceive me not, His Majesty of *Great-Britain*, his councils and actions, his ships at home, and his navies at sea, his military forces wherever dispersed or disposed in all the habitable places of the world, will give occasion for the common discourse of *Europe*, or afford matter and action plentiful for it, as far forth as an apt occasion or subject shall be offered or imposed on them, either for their councils or valor, and this with great animosity of spirit, labour and industry, not at all sparing their lives or blood in the defence of this country, or honour of its service

For without doubt in this and the ensuing years, very great and superlative actions will be manifestly apparent, not only in *England*, but in most countries and kingdoms of *Europe*, and many honest well meaning persons must be content to undergo much labour and trouble, I fear also a corrupted and contagious air, which may not only be dangerous, but very destructive to mankind: God preserve us from a plague, and other pestilential diseases. Much more might be said, but being limited, I must proceed to the consideration of the summer quarter, and conclude with the words of the poet:

The man who changes gold for burnish'd brass,  
Or small right gems for larger ones of glass,  
Is not at length more certain to be made  
Ridiculous and wretched by the trade,  
Than he who sells a solid good, to buy  
The painted goods of pride and vanity.  
If thou be wise, no glorious fortune choose,  
Which 'tis but pain to keep, yet grief to lose;  
For when we place e'en trifles in the heart,  
With trifles too, unwillingly we part.

The

The summer quarter takes its beginning when the sun touches the first scruple of Cancer, which this year initiates the 21st of June, near 4 in the morning, at which time we have 23 degrees of Aquary culminating, and the latter end of Gemini ascending, the moon in the 12th, in 21 degrees of Gemini, separating from the opposition of Saturn, and applying to the body of the Sun; Venus and Mercury, who are near together in an active sign, informing our judgments, that the nation or kingdom of *Great-Britain*, and other adjacent countries or people are in serious consideration concerning some late ambiguous intelligence, transmitted hither from parts beyond the seas, occasioning fears of danger from the the navies at sea, or colonies or friends in the southern and eastern parts of the world.

At this ingress the three superiors are all retrograde in obscure houses of the figure, an affair that seldom happens, and gives cause to suspect the transcendancy of some martial action either lately to have happened, or to be near at hand betwixt the powers that are at war. Very many plots and designs are now on foot.

Ponderous affairs require advised consultations, wherein the Fabian result will exceed the Marcelline: If ever there were, then now most certainly great councils are on foot, to provide for, and second great actions ready to be put in execution, where the great director of humane affairs shall determine.

The autumnal quarter begins when the sun (to vulgar appearance) touches the first scruple of the equinoctial sign Libra, which this year is on *September* the 22d, 5 hours 16 min. p. m. at which time we have 20 deg. of Sagitary on the med-cœli, and 5 degrees of Pisces ascending. This quarter comes in with many favourable configurations of the planets, whence we may justly hope for a kind and pleasant season, yet the people seem dissatisfied, as the separation and application of the Moon to the body of Saturn plainly shews, and will always more or less be so: But to sum up all in a few words, I judge there will be more consultation than action this quarter; some will (notwithstanding the best that can be desired) be designing and plotting mischief against the innocent, though they ruin themselves thereby, let such hot-headed persons look to it—he that set them to work, will in the end pay them their wages, let them take their fate: We know *habent sua fata, et regna, et homines, &c.*
